Biomass and alternative fuels in heating sector

6th edition
October 17-18, 2024
Luxor Hotel,
Lublin, Poland

In Poland biomass is the second most frequently used renewable energy source. Today, biomass and energy fuels are particularly interesting for the **heating industry**, which urgently needs to carry out an energy transformation based on renewable sources. Local heating plants are looking for suppliers of proven technologies and raw material suppliers.

- how to modernize the heating sector?
- how to choose the right technology and fuel for the installation?
- what are the benefits of biomass and alternative fuels?
- what are the barriers to their use in Poland?

The answers for those questions you'll find at the 6th Conference „Biomass and alternative fuels in heating”!

Join the conference organized by the publisher of „Biomasa Magazine”.

The conference is addressed to:

- heating and energy companies,
- biomass producers and traders,
- alternative fuels producers,
- suppliers of technologies and equipment for heat sector, energy sector, industry.

In the programme site visit to biomass plant
in **MEGATEM-EC LUBLIN** (Friday, October 18).

Practical knowledge and valuable business contacts!
